

Northwind Department Guidelines (Fictional)

Purpose

This fictional document summarizes how each department at Northwind Retail Group operates, to help new employees understand cross-team workflows.

Engineering

Engineering follows two-week sprints with planning on alternating Mondays. Code changes require at least one peer review before merging to the main branch.

Marketing

Marketing campaigns are planned quarterly and reviewed in a monthly content calendar meeting. All external-facing content requires brand team sign-off before publication.

Sales

The sales team operates on a monthly quota cycle. Deals above \$50,000 require director approval before a contract is sent to the customer.

Customer Support

Support tickets are triaged by priority, with a target first-response time of 4 business hours for standard tickets and 1 hour for critical issues.

Finance

Expense reports must be submitted within 15 days of purchase, with receipts required for any expense over \$25. Reimbursements are processed on a bi-weekly cycle.

Cross-Department Communication

Each department maintains a dedicated Slack channel for questions. For cross-team projects, a designated point-of-contact is listed in the internal team directory.
